

Working together and getting things done.

(L-R) Aura Lee MacPherson, Chair of CLEM; Sandra Masters, Mayor of Regina; Angela Pratt, CLEM; Lori Bresciani, Councilor City of Regina.

City of Regina Update

Due to the stalled rain event on June 11, 2021, a discharge of wastewater was released from the City of Regina into the Qu'Appelle River system. Since then the Calling Lakes Ecomuseum and the City of Regina have had many discussions.

These discussions led to three motions made on September 29, 2021 by the City of Regina.

<http://reginask.igms2.com/Citizens/FileOpen.aspx?Type=12&ID=2864&Inline=True>

We believe that working together is what is best to improving water quality. This is a very bold step taken by the City of Regina and we applaud them and show our gratitude.

Lower Qu'Appelle Watershed Stewards

We are impressed with the work of the Lower Qu'Appelle Watershed Stewards. Their vision is a long term stable, high quality water supply for people and for the environment; and healthy ecosystems.

This winter they will be writing a series of articles that about water quality. The first one is called, "Are we being hydro-illogicle?" www.lqws.ca

They receive funding from WSA. Thank you WSA and Lower Qu'Appelle for the work you do to protect our water.

PARCS (Provincial Association of Resort Communities in Saskatchewan)

This past October PARCS held a webinar about water quality and the importance of a wetland policy.

This 45 minute webinar is a good review of the work being done and where we need to go.

Grab a cup of coffee and enjoy. <https://youtu.be/Qi2h6kHVRW8>

Thank you PARCS for the great work.

Call to Action

Please contact Honorable Fred Bradshaw at 306 787 6447 or email at hi.minister@gov.sk.ca and share the work that the Lower Qu'Appelle Watershed Stewards is doing and is very appreciated.

CLEM is working with the Last Mountain Lake Stewardship Group to ensure the health of our lakes in southern Saskatchewan.
